

MOTION & PACOLLS

(Plastic Bucket Manufacturing Division)

Manufacturing
RELIABILITY

Corporate History

Motion & Pacolls (Plastic Bucket Manufacturing Division) was established in 1988 with a vision to suffice the growing needs of sustainable and robust packaging solutions which is safe and convenient to transport and export.

Motion & Pacolls was the first company in India to introduce superior quality PPCP plastic container buckets; for which the technology and machinery were then sourced from Europe. During the late 80s and 90s Motion & Pacolls (Plastic Bucket Manufacturing Division) was the only company/ OEM supplying container buckets to leading companies and renowned brands for their product packaging applications.

The company is proud of its heritage which promotes product innovation, customer focus, and strategic growth. The dedication of team members has allowed the company to grow into a leading supplier and manufacturer. Today, Motion & Pacolls is a synonym of trust and quality.

Corporate Overview

Motion & Pacolls is a leading manufacturer of elevators, escalator and plastic container buckets. The company was formed as a result of merger between two manufacturing business divisions - elevators/ escalators and plastic container buckets. With a humble beginning 35 years ago, Motion & Pacolls is an outcome of decades of continuous transformation and innovation. Today, the organisation has grown leaps and bounds to become a leading conglomerate having business ranging from manufacturing to exports.

Motion & Pacolls (Plastic Bucket Manufacturing Division) is the pioneer in manufacturing and supply of superior quality PPCP plastic container buckets of various sizes used for diverse packaging applications.

Motion & Pacolls has partnered with several OEMs to supply customised container buckets for Chemicals, Fertilisers, Oil & Petrochemicals, FMCG, Pharmaceutical, Paints and Food Products at large. These sustainable and reliable container buckets are manufactured using injection moulding process. The company has distinctive know-how of the injection moulding process, determining its success of providing unmatched product quality with holistic value added services. Right from injection moulding to designing and labelling; the entire process happens in-house. Process and technology driven, Motion & Pacolls has been successful in understanding the needs of the market, thereby providing solutions that provides competitive advantage in terms of improved quality, appeal, efficiencies and increased profitability.

Infrastructure

Over the period of 35 years, Motion & Pacolls has consistently invested in upgrading the infrastructure, machinery and technology to offer finest quality of products, at par with international standards. The infrastructure is well planned and strategically designed, having dedicated areas for diverse manufacturing activities including testing, manufacturing, packaging, storage, and also possesses an integrated corporate office in the plant estate.

The robust & high-tech infrastructural facilities are the foundation of Motion & Pacolls' ability to offer comprehensive production capabilities, right from designing to manufacturing and labelling. All the production activities are driven by processes and SOPs are followed at every stage of the process.

The company houses cutting-edge injection molding machinery, enabling them to deliver large scale consignments on-time. In addition, Motion & Pacolls possesses modern screen printing and heat transfer technology machines for product labelling. Motion & Pacolls has and will continue to invest in machines and automation to stay ahead of the curve in the industry.

Product Details

Motion & Pacolls was the first manufacturer and supplier in India to provide plastic container buckets, the technology and machinery for which were sourced from Europe. These plastic container buckets are available in wide range of sizes, from 200 ml to 23 litres to suffice small to large quantity packaging requirements.

From speciality chemicals to fertilisers, food products to FMCG and paints to fertiliser, these plastic containers are best suited for diverse packaging applications. The plastic containers are manufactured using 100% virgin, PPCP impact co-polymer through injection moulding process. In addition to manufacturing, Motion & Pacolls provides solutions like designing and labelling.

The plastic container buckets are robust, sustainable and built to last for ever under extreme conditions keeping the content inside safe and secure. The plastic container buckets are highly appreciated and preferred for their distinctive features like leak proof, non - reactive, reliability and durability. Due to these virtues and capabilities to handle rough environment, these plastic container buckets are preferred packaging solutions for wide variety of applications.

Product Characteristic

- Available from small to big size, ideal for multiple packaging and storing applications
- Tough, sturdy and durable
- Withstand extreme conditions
- Made using food grade plastic hence safe for storing FMCG and edible products
- Leak proof and does not reactive with stored content
- Available in different colours
- Light weight, easy to transport and export
- Extremely versatile and customisable

Product Applications

Ideal for packaging of powder, solid and semi-solid products for following industries and sectors:

**Speciality
Chemicals**

Fertilizers

**Oil &
Petrochemicals**

Paints

Pharmaceutical

Healthcare

FMCG

**Food/ Edible
Products**

DIY Kits

**Gardening
products**

Value Added Services

Motion & Pacolls is not just a manufacturer or supplier but, a facilitator, a solution provider. In addition to manufacturing, the company offer extensive services including design and labelling using screen printing and heat transfer (foiling) process.

With value added services, the company provides one stop holistic solutions, from manufacturing to labelling thereby, reducing the overheads and post production labelling hassle of the clients. The entire production process also proves to be economically viable and saves precious time as no additional coordination for labelling is required.

In accordance with the design and branding of the client, the company offers customised labelling solutions using screen printing or heat transfer; which ever technique suits the best.

The screen printing or heat transfer i.e. foiling process offers high quality, visually appealing graphics output with fine finish. The graphics and labelling are durable and long lasting, providing attractive packaging appearance.

Support

Motion & Pacolls is not just a manufacturer or supplier but, a solution provider. The company offers extensive supports to the clients for design and development of products, labelling and creating moulds.

The design and required size of the plastic container bucket has key impact on quality, reliability, functionality and manufacturability. It effects how quickly a new product can be introduced and is a key driver of the competitive advantage. Due to this important reason, Motion & Pacolls invest time, sources and energy on design, supporting the client in their product development process.

Motion & Pacolls support process includes:

Bucket Design

Understanding the type of product to be stored and end use objective and environment in which the packaging will be stored/ marketed.

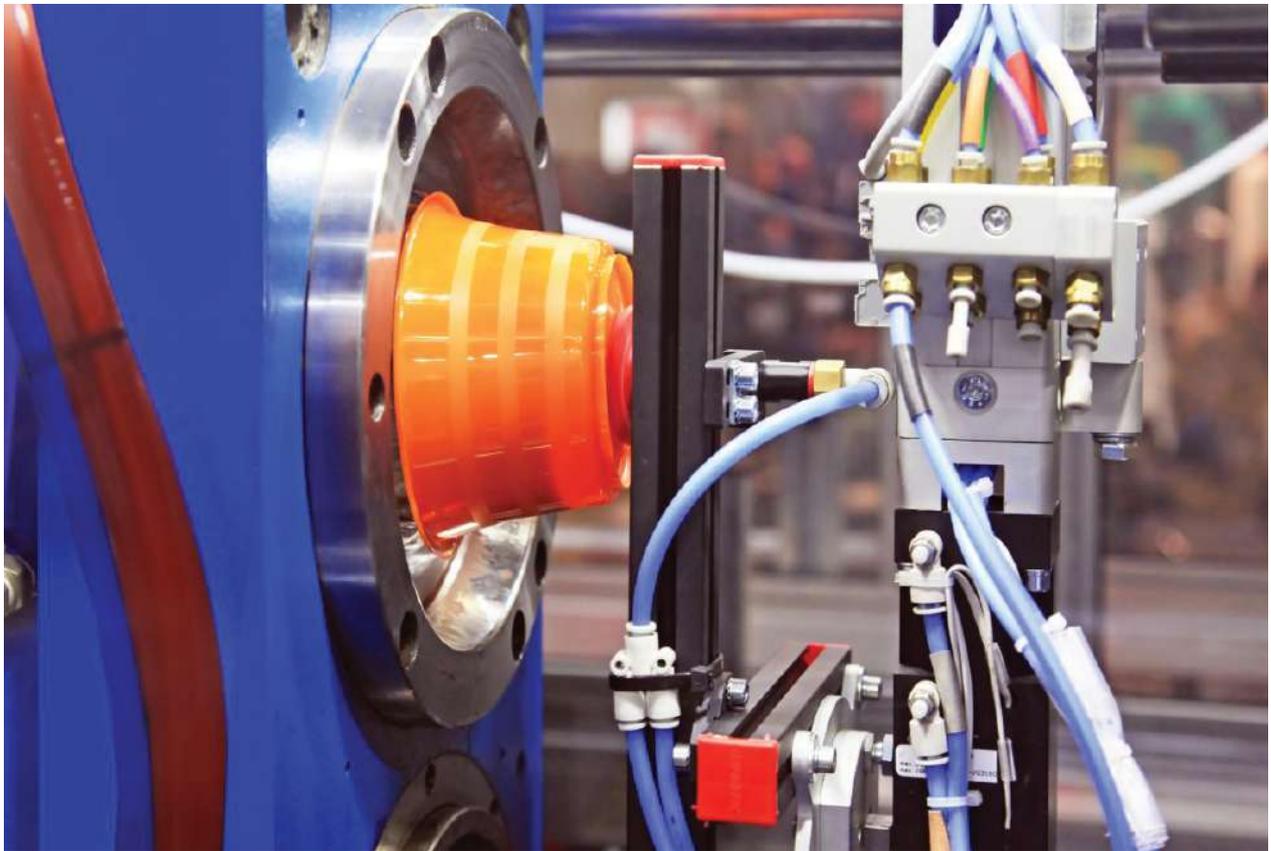

Product Trials

Production trials and different testes are conducted to ensure the fitness of the product and confirm its end use capabilities

Labelling

In addition to design and manufacturing support, the company offers labelling support so that the clients gets all the services and assistance under one roof.

Competitive Edge

First Company in India to manufacture Plastic Container Buckets adopting European Technology

Legacy of over 35 years

From Manufacturing to Labelling, entire production process happens in-house

Plastic container buckets available in wide range of sizes, from 200 ml to 23 litres

Strong national as well as international presence

Highly qualified technical team with decades of experience

Stringent quality control process

Multiple QC tests are conducted to test product durability

Design, mould and product development support

Quick turn around time for faster delivery

ISO & UL Certified. UN approved products

Modern infrastructure with latest plant and machineries

Quality Assurance

It is the primary objective of Motion & Pacolls to offer nothing but the best to their customers. Quality assurance procedures and required SOPs are clearly defined to make sure every container bucket manufactured is a masterpiece. The objective of the company has always been to offer products having optimum quality, high efficiency, sure dependability and lasting durability at commercially viable prices; possessing appealing aesthetics for complete customer satisfaction.

The raw materials used i.e. PPCP impact co-polymer are 100% virgin and food graded that are sourced from reliable and renowned companies including Reliance and IOCL. At Motion & Pacolls continuous enhancement and improvement of production system and services are carried out in order to be at par with national and international standards and set new benchmark in the industry to follow.

Customer satisfaction is the primary focus which is not possible unless quality and manufacturing superiority is maintained. No doubt, Motion & Pacolls is the most preferred partner for container buckets thereby enjoying maximum repeat order rate.

Quality Control

At every stage of the production and manufacturing process, stringent quality control compliances are carried out to ensure superior quality of product experience. The stringent quality control processes and well defined SOPs reflects the commitment of the company to offer nothing but the best thereby upscaling the customer satisfaction.

Motion & pacolls' products are UN Approved and UL Certified. In addition the company is also ISO Certified, reflecting extremely high quality control standards. The company employs Zero-Tolerance policy pertaining to any quality control loop holes.

The products have to undergo strict test to ensure the fitness, durability and accountability. These tests are conducted by the experts and the products have to pass through the challenging conditions.

To achieve quality & perfection, the products passes through stringent quality tests:

- Stack Test:
- Drop Test:
- Leakage Test:

Inspection Process:

- Testing: Incoming raw materials are checked for any lot variation before utilising further for production activities
- Inspection & Servicing: Examination and servicing of moulds to obtain defect less production output.
- Extensive Testing: Stack test, drop test and leakage test in addition to few other tests are carried to ensure best in class product offerings.
- Dispatch: Dispatch and packaging activities are supervised to make sure correctness of the consignment including quantity and safe transport

Core Team

Motion & Pacolls is a people centric company who strongly believes in adding a value in the lives of all its team members, the company's biggest assets. One of the philosophies of Motion & Pacolls is to rally in service of its team members so that both can grow together and enrich a better and prosperous future.

The company employees senior level marketing, management and production executives; technical supervisors; admin and accounts team members and production staff. Motion & Pacolls understand the importance of work-life-balance and promotes the same internally.

The company harnesses its people, culture and depth of experience and expertise it has gained over the period of 3 decades which has been the driving force of innovation and new development, internally and externally of the company.
